

## BSK Breather Papers

Grade	Product Code	Roll size
40	44GSK40	1000mm x 100m
234	44GSK234	1000mm x 100m
50	44GSK501250	1250mm x 50m

## BSK Insulation Facings

Insulex 911/963	44GSK911	1000mm x 100m
-----------------	----------	---------------

## BSK Vapour Control Layers

Insulex 714	44GSK71425	1000mm x 25m
	44GSK71450	1000mm x 50m
Insulex 716	44GSK716	1000mm x 50m
Insulex 718		1220mm x 50m

A full range of BSK breather membranes, vapour control layers and insulation facings is available from Encon Insulation.

## Glidevale Vapour Control Membranes

VC Foil Insulating Control Layer	1.25m x 40m
VP400 - Vapour Permeable Roofing Underlay	50m x 1.5m
TF200 Vapour Permeable membrane for Timber Frame Walls	100m x 2.7m
TF200 Vapour Permeable membrane for Timber Frame Walls	100m x 3.0m

## Kingspan nilvent

A breathable membrane for unventilated pitched roofs. For further information see page 26.	50m x 1.5m
-----------------------------------------------------------------------------------------------	------------

## Rooflights

A range of modular rooflights, access hatches and continuous barrel vault rooflight systems are available. The products are suitable for a variety of building types and can be made to measure for non-standard situations. Industrial rooflights are also available.

## Fixings for Pitched Roofs

Helical fixings for pitched roof insulation boards in warm roof application. Available in a range of sizes 75 to 220mm lengths. With hand and power support tools. The length of fixing to be used is determined by the thickness of insulation and counter batten. With increased thickness of insulation the use of the correct fixing is essential. A minimum of 35mm should penetrate the rafters and this must always be checked with the roofing system designer. Typical product code 42DIS090

## Glidevale Protect

Product	Roll Size m	m <sup>2</sup> / Roll
Glidevale Protect A1	30 x 1.5	45
Glidevale Protect A1	45 x 1.0	45
Glidevale Protect A1	15 x 1.0	15
Glidevale Protect VP400	50 x 1.5	75
Glidevale Protect VP400	50 x 1.0	50
Glidevale Protect TF200	100 x 1.3	130
Glidevale Protect TF200	100 x 2.61	261
Glidevale Protect TF200	100 x 2.7	270

## BSK Vapour Control Membrane

A full range of BSK breather membranes, vapour control layers and insulation facings is available from Encon Insulation.

## Rooflight

A range of modular rooflights is available from a variety of manufacturers. Please contact your local Encon branch.

## Glidevale Protect A1

Protect A1 is a third generation roofing underlay which has been developed specifically to overcome the disadvantages of traditional Type 1F felts and second generation plastic sheet materials. Cost effective and totally waterproof, Protect A1 is suitable for use where insulation is at joist (cold roof) or where it follows the ceiling.
